

ATTRACTION NAIL EXTENSION SYSTEM INSTRUCTIONS FOR USE

Natural Nail Prep:

1. Sanitize clients hands, your hands and working area with *NSI Sanitize*.
2. Remove polish with *NSI Acetone*.
3. Push back cuticles with a *NSI Cuticle Pusher*.
4. Gently remove all the shine from natural nail surface with vertical strokes using *NSI Black Cushion 180 File*.
5. Remove dust filings with the NSI Plush Brush.
6. Apply Nailpure liberally to the natural nail plate and let dry to a chalky white.
7. Apply NSI nail tip of your choice or NSI Gold or Touch Tab Form.
8. Apply Superbond Primer once to natural nail surface sparingly and allow to dry completely.

Brush Prep: Wet entire brush into NSI Brush Cleaner, wipe to dry thoroughly on nail wipe. Immerse brush in Attraction Nail Liquid and wipe to dry thoroughly on nail wipe, so to ensure that all Brush Cleaner is removed from the brush.

Product Ball Size Pick Up:

1. Fill NSI dappen dish with Attraction Nail Liquid – approx. ¼ full.
2. Emerge entire brush into Attraction Nail Liquid, releasing air bubbles with light downward pressure.
3. Wipe backside of the brush on the edge of the dappen dish to release proper amount of liquid.
4. To obtain the correct size of product ball :
 - a. large ball : wipe brush tip only
mostly used for free edge
 - b. medium ball : wipe brush from center to tip
mostly used for free edge, stress area and overall finish
 - c. small ball : wipe brush from ferrule to tip
mostly used for cuticle area
5. Put the tip of the brush into powder and drag slightly with front side of the brush towards you to pick up a shiny ball. Ball should be firm, not powdery or falling off brush.

Powder Pick Up:

CLASSIC, SPEED & COMPETITION: With tip of brush only, lightly drag and hold brush into powder to pick up a shiny, firm product ball.

Product Placement

a) SCULPTURE NAIL WITH NSI GOLD OR TOUCH TAB FORMS

NOTE : Choice of powder balls for

Natural nail look	or	French look
Ball #1 : natural		Ball #1 : white
Ball #2 : pink		Ball #2 : pink
Ball #3 : pink		Ball #3 : pink
Ball #4 : clear		Ball #4 : clear

1. Free edge product ball #1 : Pick up correct product ball size for desired length. Press and release product ball onto nail plate in the middle of natural smile line. Using the center of the brush, pat ball from side to side, covering natural smile line and down onto the form until desired length.
2. Stress product ball #2 : Pick up correct product ball size for stress area. Press and release product ball onto middle of the nail plate slightly above the smile line. Using the tip of the brush, gently pat the ball from the middle to sidewalls. Lightly stroke down from middle of the nail plate to free edge.

3. Cuticle ball #3 : Pick up correct product ball size for cuticle area. Press and release product ball onto nail plate just below cuticle at center. Using the tip of the brush, gently pat product to a hair's width from cuticle and sidewalls. Lightly stroke down from cuticle to free edge.
4. Overall finish ball #4 : Pick up correct product ball size for overall finish. Press and release product ball onto nail plate midway between cuticle and stress/smile line area. Gently stroke down over entire nail surface.

Finishing:

1. Using NSI Brown 100 Grit File, shorten and shape sidewalls and free edge as needed.
2. Using NSI Black Cushion 180/240 Grit File, clean sidewalls with vertical strokes and cuticle area with a circular motion.
3. Smooth and contour entire nail surface.

Perma Gloss Application :

1. After filing of acrylic nails, brush away filings with *NSI Plush Brush*. Do not wash hands or use oil.
2. Wipe with NSI Cleanse using an *NSI Nail Wipe* over the entire nail, including the free edge.
3. Apply *Perma Gloss Prep* in vertical strokes from cuticle to free edge. Be sure to cover deep into sidewall areas and nail edge thickness. **DO NOT OVERSATURATE.**
4. Allow *Perma Gloss Prep* to dry for one minute.
5. Apply *Perma Gloss* liberally but not excessively to entire nail surface including side walls and nail edge thickness. (Do not touch sidewalls or cuticle)
6. Place hand into *NSI 9 Watt UV lamp* for two minutes.
7. Remove tacky gel dispersion with *NSI Nail Wipe* saturated with *NSI Cleanse*. Wipe again using a clean wipe.
8. Apply *Nurture Oil* – a drop to each cuticle and massage in. Have client wash hands only at the end of the procedure, not before.
9. Leave nails natural or polish & seal with *NSI Thermoshield*.

All NSI products must be kept at room temperature (65-80°F).

CAUTIONS:

Do not apply NSI products to damaged, injured or inflamed cuticles or fingers. Avoid touching skin with product. Remove any uncured product with sterile instrument. Discontinue use if skin or nail irritation occurs. Avoid eye contact. Keep all NSI products out of children's reach. Use in well-ventilated area. Accidentally spilled NSI products on skin or clothing should be flushed with water and washed with soap. Rinse thoroughly. Consult your local government as to accepted form of waste disposal for all chemical products. In case of emergency, retain packaging and contact a physician immediately. For emergency medical information, contact Infotrac Chemical Emergency Response at 1-800-535-50553 or 1-352-323-3500.
